

# The Public Interest

I watched the tracer fire  
The clever graphics and the maps  
With every glorious detonation  
Someone blown to little bits

But the public interest must be fed  
This greatest show on earth  
So step right up and take your seat  
Watch the bloody fireworks!

It's bad enough on Sky  
But if you're feeling bolder  
You can switch to Al Jazeera  
And watch real bodies smoulder

I've no stomach for this stuff  
And it seems so sad to me  
That time won't wither appetites  
For this sad pornography
